FYI: ChicagoLand DMR Net Schedules?

ChicagoLand publishes a large list of talkgroups, but it does not publish a complete Monday–Sunday "net schedule" for all of those talkgroups.

Many are simply available DMR talkgroups, and individual repeater owners or groups may conduct nets on them. The one I can positively confirm as a scheduled net on the ChicagoLand system from your area is the **PRRA DMR Net**.

ChicagoLand DMR — confirmed information

The ChicagoLand Control Center currently lists **90 available talkgroups**. Some are regional/state talkgroups, some are TAC groups, and some are specifically labeled as nets or local groups.

Talkgroups of particular interest for your OpenSpot

TG	Name	TS	ChicagoLand
9	Site Local 9	1	**Yes**
8888	**CHI-Net**	1	**Yes**

123	UA English 2	2	**Yes**

FYI: ChicagoLand DMR Net Schedules?

The ChicagoLand matrix is the authoritative source for which talkgroups exist on the system.

* **TG 3555 is particularly important for you:** PRRA says it is used **only through a hotspot**, via the **DMR+ IPSC2-CLAND server**, and it bridges to Local 9.
